

CLOUD & DEVOPS

Public and Private Cloud Migration Readiness Assessment

Why?

For enterprises wanting to build an actionable data-driven cloud strategy and plan. In this assessment we'll answer the following questions:

- Which applications should and could be moved to the cloud?
- How much effort will it take to move them?
- What are the technical & operational requirements for the applications in the cloud environment?

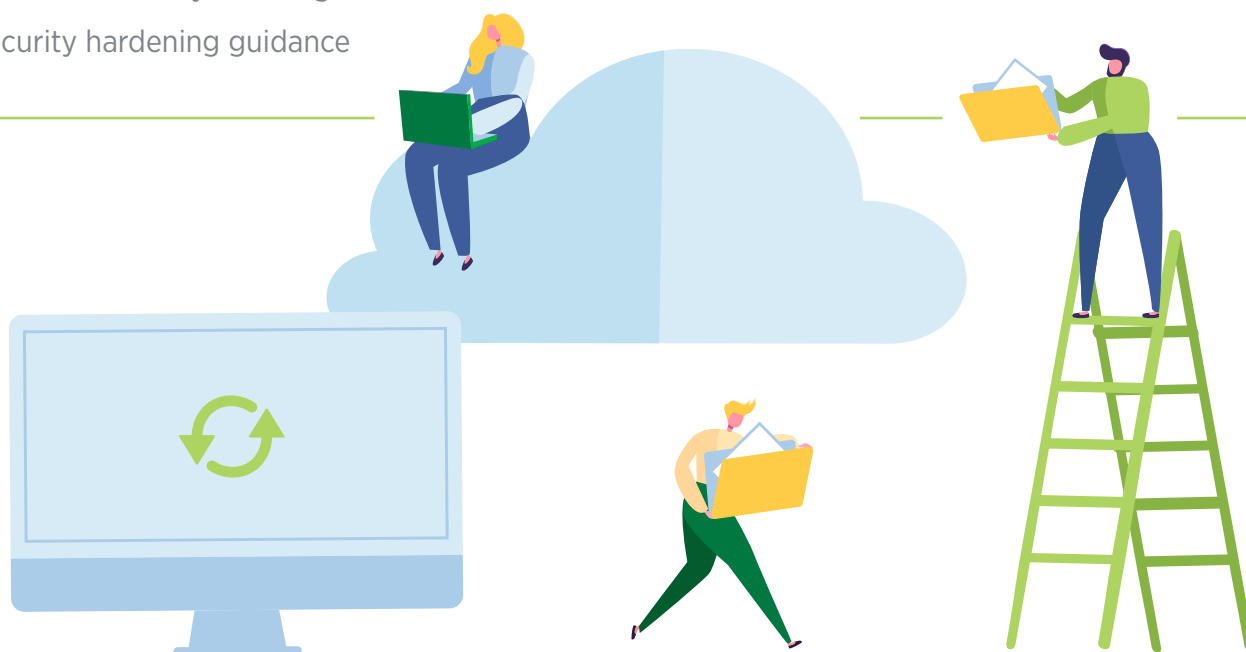

How?

Over 45 to 60 days we will analyze target applications focusing on their usage and workload requirements (over a long enough period of time to determine up-time requirements) and execute a comprehensive application mapping.

THE VALUE

Upon completion we will provide a detailed plan and recommendations that provide the following:

- Cloud financials with detail at an application or workload level
- Cloud or Data Center migration plan
- Network micro-segmentation recommendations and design
- Disaster Recovery Planning
- Security hardening guidance

OUR STRATEGY & VISION

Users

- End-User Computing
- Collaboration
- Mobility

Applications

- Data Analytics & IoT
- App/Dev
- Core Business Services

Infrastructure

- Network/Storage/Compute
- Private Cloud/Public Cloud
- Software-Defined/Converged/Hyperconverged

Process

- Service Management
- Operations Management
- DevOps

Security

- Governance, Risk & Compliance
- Security Controls
- Incident Management & Response

CLOUD

The connective tissue of digital business

40+
AWARDS
SINCE 2010

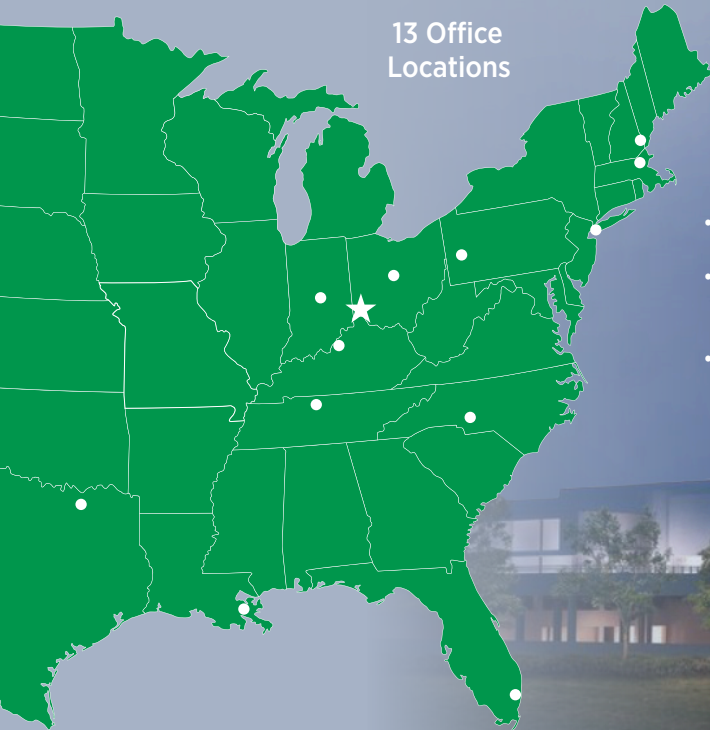

- Inc. Top 50 Places to Work in the USA
- Forbes Most Promising Companies
- Inc. 5000 Fastest Growing Private Co.
- Business Journal/Enquirer Top Work Places
- CRN Tech Elite 250 Award
- Ernst & Young Entrepreneur of The Year
- CRN Solutions Provider 500 Award
- CRN Triple Crown
- Deloitte USA 100 List

3:1 RATIO TECH TO SALES

We believe that if you know your craft and put the customer first, sales will follow. That is why our engineers outnumber account managers 3 to 1.
